

World Sea Turtle Day

Is June 16th!

Did you know. . . Every year, 16,000 lbs of plastic are dumped in our oceans. Because of this, 6 out of the 8 species of sea turtles are on the verge of extinction. Estimates conclude that approximately 100,000 turtles are affected each year. Turtles of all kinds get caught in the plastic. Sea turtles eat plastic, mistaking it for the jellyfish they so love to feast on.

The truth is, plastic affects all wildlife, not just sea turtles. And we need to start being responsible for our actions. Will you help?

Today through June 20th, we are donating 25% of all proceeds from our Respect the Turtles collection to a charity that cleans plastic out of the oceans.
